HARVEST SOLAR

Are you frustrated over skyrocketing energy costs? Tax credits, grants, power company incentives and depreciation make payback on solar energy solutions timely and affordable.

Harvest Energy Solutions provides cost effective, renewable energy solutions to agricultural, commercial and rural residential customers throughout the Midwest. From product selection and site assessment to on-site installation and follow-up maintenance, we partner with our customers throughout the entire process.

Since 2006, our goal has been to assist farmers and ranchers in becoming more energy independent, sustainable and efficient.

Our expertise in sales, design and installation of solar energy systems assures that every detail is addressed; from energy audits to grants to local utility applications, we assist you in every phase of the process in choosing just the right solution to meet your needs.

At Harvest Energy Solutions we also know how important financing partners are. We have relationships with the most trusted lending institutions in the Midwest to assist you with your financing needs. In addition to financing, we can help identify other options and incentives such as:

- GRANTS
 - Renewable Energy Grants
 - USDA REAP Grants
 - State Grants
 - Local Utility Grants
- SOLAR RENEWABLE ENERGY CREDITS (S-REC's)
- SPECIAL UTILITY PROGRAMS
- TAX CREDITS
 - Residential Renewable Energy Tax Credit
 - Business Energy Investment Tax Credit (ITC)
- DEPRECIATION
 - Modified Accelerated Cost-Recovery System (MACRS) + Bonus Depreciation

From the first conversation through project completion - Harvest Energy Solutions is dedicated to providing quality products and service at every phase of the sale, design and installation of your energy system.

Why Solar Energy?

- Clean, safe, quiet and affordable renewable energy
- Offsets utility electrical costs
- No scheduled maintenance required
- Cost of complete solar array has decreased by more than 50% in the last 5 years
- 30% Federal Investment Tax Credit available
- USDA REAP Grants can cover up to 25% of project costs
- Utility incentives, rebates, depreciation and other incentives can provide an aggressive return on investment
- Advances in solar technology have increased efficiency, reliability and durability
- Production warranties up to 25 years with expected lifespan of 40 years
- Reliable, real-time and historical performance monitoring
- Industry standards/certifications (NABCEP) ensure quality installations
- More consistent production than wind turbines - cost savings up to 50%
- One more step toward energy independence

Why Harvest Energy?

- We specialize in systems designed for the agricultural, business and rural residential customer
- Six sales offices, three operations centers and a growing network of authorized dealers throughout the Midwest
- Bonded, licensed and insured in 11 states served: AR, IA, IN, IL, KY, MI, MN, MO, OH, TN, WI
- In-house - designers, engineers, installers, licensed electrician and solar technicians
- Over 100 years of combined engineering and construction experience
- Certified by North American Board of Certified Energy Practitioners (NABCEP)
- Manufacturing - metal stamping, welding, powder coating, assembly of solar racking and related components
- Proud to represent American companies and American-Made products at competitive prices
- 100% financing available - low interest with no interruptions to other lines of credit (*Independent financial services available to qualified candidates*)
- We work closely with grant writers and local utility companies to get you the best incentives available
- Family owned and operated

Finding solutions in energy - what the agricultural industry needs and what we do best!
